The Process

In partnership with Green Energy Ohio and Ohio Interfaith Power & Light, Energy Optimizers, USA is offering a special comprehensive energy audit program to select Duke Energy customers in southern Ohio.

This program provides ASHRAE Level 2 energy auditing services completed by professional and certified energy, mechanical, and electrical engineers. Take advantage of this special program to identify available energy savings opportunities and financing solutions for your faith-based, small commercial, local government, or non-profit buildings now!

Step 1: Energy Auditing

- Full building assessment
- Review of utility usage & billing or projected post-construction usage
- Identification of energy conservation measures: Lighting, HVAC systems, building automation and controls, building envelope
- Project design and energy savings projection

Step 2: Opportunity Consultation

- Review energy savings opportunities
- Financial impact assessment
- Financing options identified

Step 3: Project Implementation

- Project financing facilitation
- Turn-key project design, management, installation, and commissioning
- Rebate and incentive acquisition
- Measurement & Verification services
- Positive public relations & marketing campaign

Our Commitment

We are committed to finding energy saving opportunities that are cash flow positive and a financing process that works for you.

Energy Projects Made Simple

Our team is vendor neutral and will work with any preferred contractors to implement a project in close cooperation with building owners. **We will never issue a change order.** We never have and we never will.
