To Whom It May Concern:

The Hicksville Exempted Village School District has implemented two energy efficiency projects with Energy Optimizers, USA, including interior and exterior LED lighting retrofits and controls.

This project has produced the promised results, exceeding \$29,000 in annual energy savings. Their team worked closely with our staff throughout the entire project, without any disruption to the educational environment. We are very pleased with the results to date.

I certainly recommend Energy Optimizers, USA as a provider of energy efficiency services, including LED lighting retrofits.

If you would like additional information about the company's work with Hicksville Schools, please contact me.

Very truly yours,

Eric Bassett
